

Visualize workforce productivity in minutes with Domo and Zoom.

Getting started.

Simply input your Zoom admin credentials to begin the power-up process.

Find the app.

Go to domo.com/zoom (or install the app from the Domo Appstore), then follow the prompts to input your Zoom credentials and power it up with your data. You can also go to the [Zoom Marketplace](#) and with your Zoom admin credentials, download the Domo app and platform in minutes.

Empower your organization.

In just minutes, you have real-time insights about your company's Zoom experience.

Share with the right people, at the right time.

Domo makes it easy to set up permissions via SSO or LDAP to ensure your workforce is seeing the right information at the right time, while securing the information you don't want shared more broadly with your employees.

- See which departments are adapting to virtual or remote methodologies
- See which employees are driving team cohesion
- Identify where your key employees are spending their time

For more tips to get the most out of your Zoom data, check out our [Advanced Setup Guide](#)
